

Remote Source Bed Kit Instructions

Our 3rd Generation Bed Kit takes the AetherX imbued rejuvenation technology to the next level. The Remote Source Bed Kit can work with any bed, any size, as well as any couch or recliner in your home! The Remote Source Bed Kit comes with all the necessary components that you can print out through your own home printer and begin utilizing the technology right away feeling it tremendous regenerative benefits!

FEATURES OF THE REMOTE SOURCE BED KIT:

The Remote Source Bed Kit contains imbued transcendental frequencies that have been consecrated into the included geometric seal arrays. When the Remote Source Bed Kit has been printed out and properly implemented onto your chosen furniture, you will receive the following benefits:

- Unified bodily healing with the Source Center Vibration
- Scalar Longitudinal Vibration for omnipresent healing at a distance
- Sun Frequency integration @ 432 Hz
- Earth's Schumann Resonance integration @ 7.83 Hz baseline frequency
- Coherent energetic flow with the 13 color vibrational frequencies for bodily healing
- Astrological healing with all benefic frequencies of the outer planets
- Alpha, Theta and Delta Brainwave induced fields for deeper states of rest and regeneration
- Full body healing map & bioelectric field regeneration to detoxify, rejuvenate and replenish all vital organs and internal systems of the body
- Energetic mapping to clean and replenish all subtle body systems including the chakras, meridians, kundalini flow, etheric body systems, karmic and celestial integrative systems
- Fibonacci sequence pulsing of the vibrational frequencies that repeats itself dozens of times every second to expand the scalar field of the technology out 1.5 km in radius throughout your neighborhood.

When the directional arrays (North, East, South, West) are properly attached to your chosen furniture item, the North and South alignment produces an ethereal/astral figure 8 geometry that stretches across your bed vertically. The West and East alignment produces the same ethereal/astral figure 8 geometry that stretches across your bed horizontally. Together, these two figure 8 patterns become the regenerative power source for the physical and subtle body concentrators. The concentrators are designed to integrate the vibrational potential energy within the figure 8 geometries converting it into kinetic energy to rejuvenate and revitalize the body.

Remote Source Bed Kit Instructions

ATTACHING THE COMPONENT PDF SHEETS TO YOUR FURNITURE:

Attachment options vary depending on the material of the furniture item you wish to use for your bed kit. However, here are some recommended attachment options:

- Use the fitted bed sheet elastic to hold the directional geometries in place.
- Depending on your material, you can use different types of tape: scotch, packaging, or duct tape.
- You can also use clothing pins to attach your sheets to your bed, couch or recliner.
- You can also use clear plastic envelope adhesives to stick to your furniture item.

Once again, ensure that the directional geometries are facing **inward** towards your furniture item, not outward.

COMPONENTS OF THE REMOTE SOURCE BED KIT:

When you open the ZIP file for the Remote Source Bed Kit, you will have the following components available in PDF form:

- North, East, South & West Directional Geometry Array Sheets
- North, East, South & West Directional Geometry Arrays in compacted size (single sheet)
- Physical Body Concentrator Sheet
- Subtle Body Concentrator Sheet

PRINTING OUT THE PDF COMPONENTS OF THE BED KIT:

It is recommended to print out the PDF sheets on either card sheet paper or photo paper, however; regular office paper is acceptable. All prints must be in full color quality. No black and white prints as this will distort the full effects of the geometrical arrays and their imbued frequencies.

It is also highly recommended to have your PDF print outs contained in plastic sheet protectors for full protection from wear and tear.

Placing the directional geometric array (North, East, South, West) printed sheets on your bed can be done by:

Remote Source Bed Kit Instructions

- Tucking each sheet leaflet or compacted array cut outs with the geometric array symbol **faced inwards** against the edge of the surface of the mattress, or on the side edges of your mattress, or on the bed frame itself.
- You can also place the sheet leaflets or compacted array cut outs on the North, East, South, West directions of your couch or recliner. Remember that North is where your head rests for the directional geometric array setup.
- Use the Physical and Subtle Body Concentrators by resting the leaflets upon your body, or placing them inside or under your pillow. The Concentrators will work whether they are on your body or if they are near your body and within your energy field (about 6 feet distance away from the body is acceptable)
- Physical and Subtle Body Concentrators can be shared between people if they are placed within 6 feet of each person, or you can print out Concentrators for each additional person if you wish.
- Leaflets will fit and work successfully on any size of bed, couch or recliner.

FAQ:

Do I need to activate the components for the bed kit?

No, you don't. The Remote Source Bed Kit is automatically activated when all four directional geometric arrays are setup through your chosen furniture item. There is no need for affirmations or activations of any kind.

Do I need to amplify the components?

No, as the components of the Remote Source Bed Kit are already internally amplified to the maximum capability possible through the imbued geometries that hold the vibrational charge.

When can I begin feeling results from the Remote Source Bed Kit?

Through our previous generations of bed kits, our customers have reported feeling powerful rejuvenation effects the instant the bed kit is set up. Others have reported positive healing benefits the next morning after a comfortable night's sleep. Other can feel it overtime as the days progress. It all depends on the person and how energetically sensitive they may be, or how their body responds to subtle charged energy. Some can respond quickly; others may take longer. Nonetheless, work is being done deeply and subtly within the body for as long as you're utilizing the technology.

Remote Source Bed Kit Instructions

Any recommendations on taking care of my body after my first night's sleep with the Bed Kit?

Yes, it's recommended that you drink approximately 2 liters of spring or alkaline water the next morning as a great deal of work was done on your body overnight. Water helps to irrigate the system and can help flush out toxins and waste that has been loosened from within your body, and this aids the regeneration process each time you use your bed kit.

I have a serious health condition. Is there any way I can direct the energies of the bed kit onto an affected area of my body for accelerated healing?

Yes, and the best way is through directed visualization. As mentioned, there are two figure 8 geometries going across your bed as soon as the kit is properly attached to your bed, couch, or recliner. Using the power of visualization and directed thought, feel those two figure 8 geometries bending and converging upon the affected area of your body. Imagine as if a stream of energetic current is intersecting with that affected area and you are strengthening it more with your intended thoughts. With frequent visualization and directed intention, overtime, you will feel more rejuvenating effects benefiting any area of your body you concentrate on.
